DETAILED ACTION

Claim Objections

1. Claims are objected to because of the following informalities: (i) in claim 3, the phrase "bush" is undefined; and, (ii) in claim 5, the phrase "the collar" lacks positive antecedent basis.

Appropriate correction is required.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 2-17 are rejected under 35 U.S.C. 102(e) as being anticipated by Miura et al (US # 6,677,539). Miura discloses the claimed seat load sensor including a fixing (flange) portion (2b), a bolt portion (3), a sensor (1) arranged in-between (Col. 4, lines 3-27), a sleeve (10), and an embodiment with a "bush" or "liner" (12).. With respect to claim 4, Miura shows the flat washer (5,6). With respect to claims 5 & 11-13, the figure 4 & 5 embodiment shows that the sleeve (10) is part of the collar (13,14). With respect

to claims 6 & 14-17, it appears that the load sensors are attached to the for corners of a seat frame (I.E.: "a bracket").

Conclusion

4. Applicant's arguments have been considered but are moot in view of the new ground(s) of rejection.
